# JONATHAN COLLINS

software developer

I am full stack developer with 4+ years working with Javascript, and 3+ years working with React, NodeJS, and MongoDB. Here is why we should work together:

- Self-taught and highly motivated developer
- Strong backend experience - see my Movie Partners and Newbsanity apps
- Perpetual learner and excellent problem solver
- Google is a skill I am constantly developing
- Professional Scrum Master with PSM1 certification
- Built projects with VueJS, Gatsby, Firebase, GraphQL, Shopify, Strapi, Express, and so much more

experience

2021
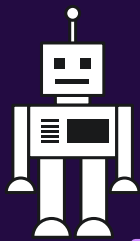

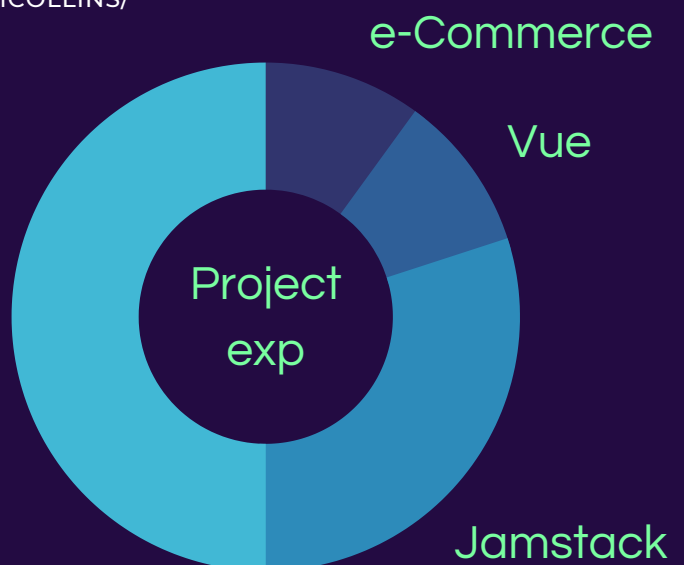

2020 — PRESENT

LINEAGE LOGISTICS
SOFTWARE DEVELOPER

I onboard and create new logistical and inventory solutions. Working with everything from web based stacks that include Javascript, to complex inventory management systems that use technologies like Java and SQL. Additional responsibilities include addressing user needs within ticket systems like Kaseya and SAMANAGE.

2014 — 2020

MAINES PAPER & FOOD
SAP VISTEX ENGINEER

At Maines I worked with complex pricing schedules and programs inside of SAP's bolt on library VISTEX. I also developed web technologies such as an advanced truck tracker using a Verizon GPS API and a web based systems dashboard for purchasing agents
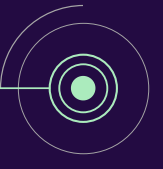

2004 — 2014

HSBC - LINSCO PRIVATE LEDGER
LICENSED FINRA BROKER

Worked with clients to increase their overall wealth, protect assets, and provide diversified income portfolios. Additionally, I worked with large financial data sets and advanced modelling techniques.
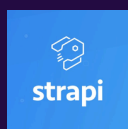

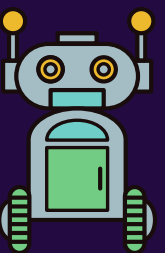

2001 — 2004

TOYS R US
STORE MANAGER

Ran day to day operations including team coordination, inventory management, and scheduling. While here I developed a repair ticketing system in Visual Basic.
